

Steinbeis Centre for Technology Transfer India has been awarded for “Excellence in RE Skilling” during the 13th edition of Renewable Energy India (REI) Expo 2019, the mega event on renewable energy, from 18 to 20 September at India Expo Centre in Greater Noida. The 5th Renewable Energy India Awards, organised on 19th September, 2019 recognised its efforts in innovation and excellence in promoting the talent in the industry.

Steinbeis India has always been notable for Innovation in Skill Development – one of the unique and prestigious project has been “Skills on Wheels” - a Mobile Solar VAN (Laboratory), a first of its kind in the world, to empower the Rural Youth with support of Telangana Academy for Skill and Knowledge (TASK), Department of IT&C, Government of Telangana. With this project Steinbeis India encouraged the rural youth in Telangana to move towards the technical world by providing training followed by employment and entrepreneurship opportunities.

Corporate world has always welcomed Steinbeis initiative of Industry related training, design, customized training programs which is essential for the development of solar industry at all levels. In a recent survey done by Steinbeis India, more than all the industry respondents rated the quality of Steinbeis India trainings as “Very Good” (8/10).

This recognition at REI Expo 2019 is an achievement for Steinbeis India, as it provides a unique distinction amongst many other industry players in the same category of the award.
